9.1. API keys are credentials provided by crypto exchange platforms enabling users to link their accounts with third-party platforms like Profitage.

9.2. API keys are imperative for certain Profitage Products. As such, deleting or modifying an API key results in immediate deactivation of a respectful Real mode Trading Bot without closing open positions, and absolves Profitage of responsibility for any unclosed positions and potential liquidations.

9.3. Users can add their API keys through Profitage Website by starting a special session in the [Profitage Telegram Bot](#).

9.4. Users are responsible for ensuring the integrity of their API keys while Trading Bots are active.
